20 GLARING ERRORS in the REFERENCES

What is referencing?

Referencing is a standardized system used in the academic communities to acknowledge the sources of information and ideas, theories, quotes, facts and any other evidence and information used to support their research or assignments.

Why referencing is important?

- to **Avoid Plagiarism** by making it clear which ideas are your own and which are someone else's
- gives **Supporting Evidence for the Ideas, Arguments, Analysis and Opinions**
- Showing the readers the **Sources of Information**
- allows readers to **Identify, Follow-up, and Verify the Sources** that author has used

Citation and Reference

- A list of sources author have cited in the text arranged in the order within the article is called **citations** or **in-text citations**.

- The references at the end of the article is called the **reference list**.

Citations

.....the suggestion of technology in the home has been explored by Baron [13] extensively. It was echoed by Thomas who pointed out that the Internet and email would bring the office into the home [14] within the next year.

.....however, the solution mentioned by Baron [13] was too far from what the present technology can offer.....

It a recent discussion on technology at home, Steve Bass [15] commented that there is no need to rush into.....

In-text citations

In recent years, there has been a growing discussion among researchers and dance artists regarding the beneficial effects of Argentine Tango (AT) as a music-based movement therapy for individuals with PD [13, 14]. AT may lead to an improvement in spatial cognition because individuals may learn spatial postures and simple paths during the dance classes, and these must be stored, remembered and used again [15].
